Skills

HTML	Node Js
CSS - SASS	Mongo DB
Javascript	Mysql DB
Typescript	Linux Server
Angular	Nginx
Next Js	Bootstrap
Rxjs Library	Tailwind
NgRx Library	Git
APIs Rest & GraphQl	

Certificates

Angular: Reactive Forms
Platzi - jun 2021

Typescript for Angular
Platzi - may 2021

Performance in Angular
Platzi - feb 2021

Angular Professional
Platzi - jan 2021

Angular Advanced
Udemy - jun 2020

Master en Javascript
Udemy - jan 2020

Profesional Profile

Detail-oriented FullStack Developer with over five years of experience working with JavaScript and related technologies. I have advanced proficiency with the Angular framework, focusing on large-scale applications that utilize RxJs and NgRx. Experienced in creating backends with Node.js, using both relational and non-relational databases.
I am a big fan of Linux, with knowledge in AWS and extensive experience in CI/CD on private VPS.

Work Experience

FullStack Developer - Teach Lead
Zygnex, October 2023 - May 2024 | Remote

I designed interfaces, defined technologies, and created the architecture along with the core code for the frontend applications using Angular and Next.js. I established CI/CD processes and configured connections to VPS for deployments in development environments. Additionally, I was responsible for creating the core code for the backend (Node.js with Express) and microservices.

Frontend Angular
MPR Group, September 2021 - September 2023 | Remote

I developed and designed application interfaces using Angular, defined the user interface (UI) with Figma, and created the CORE logical components of the application. I integrated the RxJS reactivity system and the NgRx state manager. Additionally, I was responsible for API consumption and programming the frontend logic.

Frontend Angular
Rebus Technology, February 2021 - September 2021 | Remote

I developed application interfaces using Angular, incorporating the RxJS reactivity system and the NgRx state manager. I handled API consumption and frontend logic programming. Additionally, I implemented styles in accordance with designs provided in Zeplin and Adobe XD.

Project Experience

Aitrain: AI Fine-Tuning Platform
OpenSource Project

An application for creating fine-tuning files using documents, which are then sent to OpenAI for training specific models.

Tech Stack: **Angular | LangChain | NodeJs | OpenAi APi**
